

# Safety Data Sheet

Tetradecyl Aminobutyroylvalylaminobutyric Urea Trifluoroacetate Cosmetic Suspension | 0.5% TA-AVB in Glycerin Suspension with Linatural MBS-4

Product Code FL-TAVT-GLYC-MBS4-LC-001-SDS

## Current published version — subject to change.

This document is the current web-published revision. Specifications, classifications, and recommendations may be revised without notice as additional batch and analytical data become available. **For any shipment, the authoritative document is the revision packaged with your batch — refer to that version for the values that apply to the lot you receive.**

## 1. Identification

<b>Product Name</b>	Tetradecyl Aminobutyroylvalylaminobutyric Urea Trifluoroacetate Cosmetic Suspension   0.5% TA-AVB in Glycerin Suspension with Linatural MBS-4
<b>Product Code / SKU</b>	FL-TAVT-GLYC-MBS4-LC-001-SDS
<b>Document Revision</b>	0.1
<b>Effective Date</b>	May 20, 2026
<b>Manufacturer</b>	Formulate Labs, Inc. 1645 Headland Dr. Fenton, MO 63026
<b>Quality Contact</b>	quality@formulate.co <i>Lot issues, complaints, contamination concerns, out-of-spec materials, COA discrepancies.</i>
<b>Regulatory Contact</b>	regulatory@formulate.co <i>INCI, allergens, IFRA, Prop 65, vegan/natural claims, compliance documents, formulation-use questions.</i>
<b>Adverse Effects Reporting</b>	safety@formulatelabs.ai
<b>Emergency Phone Number</b>	888-999-2260
<b>Recommended Use</b>	Cosmetic and personal-care raw material for professional formulation and manufacturing use. Intended to be incorporated into finished cosmetic products.
<b>Restrictions on Use</b>	Not intended for ingestion, injection, inhalation, or unsupervised topical use. Not a finished consumer product. Finished-product brand owners and manufacturers are responsible for final formula safety, preservation, labeling, claims, and regional compliance.

## 2. Hazard(s) Identification

<b>GHS / OSHA Classification</b>	Not classified as hazardous based on currently available information for the mixture and its component concentrations.
<b>Signal Word</b>	Not required.
<b>Hazard Pictograms</b>	None.
<b>Hazard Statements</b>	No GHS hazard statements required at this revision based on available information. Product may cause mild eye irritation from direct contact. Spilled product may be slippery.
<b>Precautionary Statements</b>	Use good industrial hygiene practices. Avoid eye contact. Wash hands after handling. Keep container closed when not in use. Clean spills promptly.
<b>Other Hazards</b>	Cosmetic raw material containing a small acetylated peptide and cosmetic-grade preservation. The supplier's HET-CAM and AMES studies on the peptide indicate non-irritating and non-mutagenic behavior at industry-standard concentrations; not all toxicological endpoints have been evaluated for the finished mixture.

### 3. Composition / Information on Ingredients

Ingredient / Chemical Name	CAS #	Function in supplied raw material	% by Weight
Glycerin	56-81-5	Humectant carrier; cosmetic raw material	35.000%
Propanediol	504-63-2	Process-integrated preservation solvent / humectant component of Linatural MBS-4	1.700%
Ethylhexylglycerin	70445-33-9	Process-integrated preservation booster / skin-conditioning component of Linatural MBS-4	0.200%
Benzoic Acid	65-85-0	Process-integrated preservative acid component of Linatural MBS-4	0.100%
Water	7732-18-5	Solvent (balance)	62.500%
Tetradecyl Aminobutyroylvalylaminobutyric Urea Trifluoroacetate	924305-87-3	Active biomimetic acetylated peptide; cosmetic raw material	0.500%

Linatural MBS-4 is used at 2.00% by weight as a process-integrated preservation system. Component percentages above represent the final raw material composition for safety data disclosure. Final labeling determinations remain the responsibility of the finished product marketer.

### 4. First-Aid Measures

Exposure Route	Recommended First Aid
Inhalation	Move person to fresh air if mist or vapor exposure causes discomfort. Seek medical attention if symptoms persist.
Skin Contact	Wash with soap and water. Product is intended for cosmetic formulation use, but prolonged or repeated contact with concentrated raw material should be avoided.
Eye Contact	Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Seek medical attention if irritation persists.
Ingestion	Rinse mouth. Do not induce vomiting. Seek medical advice if a significant amount is swallowed or symptoms occur.
Most Important Symptoms	Possible mild eye irritation; gastrointestinal discomfort if ingested.

### 5. Fire-Fighting Measures

<b>Suitable Extinguishing Media</b>	Use water spray, dry chemical, carbon dioxide, or alcohol-resistant foam as appropriate for surrounding materials.
<b>Specific Hazards</b>	Product is a water-based cosmetic suspension and is not expected to be flammable or combustible. Thermal decomposition may produce carbon oxides and irritating fumes.
<b>Protective Equipment</b>	Firefighters should wear self-contained breathing apparatus and protective gear if exposed to combustion products.

### 6. Accidental Release Measures

- Use caution: spilled suspension can create a slip hazard.
- Wear suitable gloves and eye protection for bulk spills.
- Contain spill, absorb with inert material, and place in a suitable container for disposal.
- Prevent large quantities from entering drains or waterways.
- Wash spill area with water after material is removed.

### 7. Handling and Storage

<b>Handling</b>	Avoid contamination during use. Use clean tools and closed transfer systems where possible. Avoid eye contact and prolonged direct handling. Avoid high shear, extended heat (>45 °C), and pH extremes during formulation.
<b>Storage</b>	Store tightly closed in opaque containers protected from light (Tetradecyl Aminobutyroylvalylaminobutyric Urea Trifluoroacetate is light-sensitive per supplier guidance). Refrigerate (2-8 °C) for maximum shelf life. Minimize headspace once a container is opened.
<b>Shelf Life</b>	Anticipated unopened: 18-24 months at 2-8 °C; 12-18 months at controlled room temperature (20-25 °C) when protected from heat and light. Shelf-life ranges represent the current published target derived from formulation design and analogous catalog items; finished-batch stability data may refine these ranges in a future revision. Do not assign shelf life to open or repeatedly exposed containers without in-use controls.

## 8. Exposure Controls / Personal Protection

<b>Occupational Exposure Limits</b>	No occupational exposure limits established for the mixture. Component-level limits, where they exist, apply at the individual ingredient concentrations disclosed in Section 3.
<b>Engineering Controls</b>	General room ventilation is expected to be adequate for normal handling.
<b>Eye / Face Protection</b>	Safety glasses recommended when handling bulk material.
<b>Skin Protection</b>	Use suitable gloves for repeated or bulk handling.
<b>Respiratory Protection</b>	Not normally required. Avoid generating aerosols or mists.
<b>Hygiene Measures</b>	Handle according to good industrial hygiene and manufacturing practices. Wash hands after handling.

## 9. Physical and Chemical Properties

Property	Anticipated Value / Description
Appearance	Clear to faintly straw aqueous solution. Lot-to-lot color variation is expected to be minimal at this peptide loading.
Odor	Mild characteristic; no added fragrance
pH (target)	4.5-5.1 at 25 °C (anticipated)
Specific Gravity	Approximately 0.97-1.05 g/mL (anticipated)
Solubility	Water-miscible / water-compatible
Flash Point	Not applicable; aqueous product
Flammability	Not expected to be flammable
Boiling Point	Not determined; aqueous system
Viscosity	Anticipated low-viscosity pourable solution; lot-specific value will be reported on the COA once production batches are run.

## 10. Stability and Reactivity

<b>Reactivity</b>	No dangerous reactivity known under recommended handling and storage conditions, based on available component data and analogous cosmetic suspensions.
<b>Chemical Stability</b>	Anticipated stable under recommended storage conditions. See the Formulation Guidance section of the TDS for finished-formula compatibility considerations.
<b>Conditions to Avoid</b>	High heat, freezing, repeated contamination, direct sunlight, extremes of pH, and high-shear mixing once dispersed in the finished formula.
<b>Incompatible Materials</b>	Strong oxidizing agents, strong bases, strong reducing agents, and high-dose chelators where applicable to the active in this material.
<b>Hazardous Decomposition</b>	Carbon oxides and irritating fumes under fire or thermal decomposition conditions.

## 11. Toxicological Information

Endpoint	Information
Acute Toxicity	No mixture data available. Not expected to be acutely toxic under normal industrial handling based on available component information and use concentration.
Skin Corrosion / Irritation	No mixture data available. Not expected to be corrosive based on available component information.
Serious Eye Damage / Irritation	Direct contact may cause mild temporary irritation.
Sensitization	No mixture sensitization data available. Patch testing of finished formulations per standard cosmetic protocol is recommended.
Carcinogenicity	No component intentionally added at $\geq 0.1\%$ is known by Formulate Labs to be listed by IARC, NTP, OSHA, or ACGIH as a carcinogen, based on the current ingredient deck.
Additional Information	Toxicological properties of the finished mixture have not been fully investigated. Use with caution appropriate to cosmetic raw materials.

## 12. Ecological Information

- Ecotoxicity data for the finished mixture are not available.
- Avoid uncontrolled release to the environment or waterways.
- Product is primarily aqueous and contains cosmetic-grade components, but no complete biodegradation claim is made for the mixture.

## 13. Disposal Considerations

Dispose of product and contaminated packaging in accordance with federal, state, and local regulations. Do not discharge bulk product to drains or waterways. Empty containers should be cleaned or disposed of according to site procedures.

## 14. Transport Information

Mode	Classification
DOT	Not regulated as dangerous goods based on available information.
IMDG	Not regulated as dangerous goods based on available information.
IATA	Not regulated as dangerous goods based on available information.

## 15. Regulatory Information

Regulation / Program	Status / Statement
OSHA HazCom	Not classified as hazardous under the OSHA Hazard Communication Standard based on available information.
SARA 302 / 304	No intentionally added components known to be subject to emergency planning notification at listed thresholds.
SARA 311 / 312	No SARA hazard categories expected for this mixture at this revision.
SARA 313	No intentionally added components known to be reportable under SARA 313 at listed thresholds.
California Proposition 65	No Proposition 65-listed chemicals are intentionally added. Trace environmental constituents may be present in naturally-derived materials; batch or periodic testing should be used where Prop 65 exposure assessments are required.
EU / REACH	See separate REACH/SVHC and regulatory statement where provided. Recipe-specific REACH packets are issued on request via regulatory@formulate.co.

## 16. Other Information

<b>Prepared By</b>	Formulate Labs Quality / Regulatory
<b>Issue Date</b>	May 20, 2026
<b>Revision</b>	0.1
<b>Abbreviations</b>	GHS: Globally Harmonized System; OSHA: Occupational Safety and Health Administration; SDS: Safety Data Sheet; COA: Certificate of Analysis; INCI: International Nomenclature Cosmetic Ingredient; CAS: Chemical Abstracts Service; SVHC: Substances of Very High Concern.
<b>Disclaimer</b>	The information herein is provided in good faith based on current formulation information and available supplier data. It is not a warranty of merchantability or fitness. Users are responsible for determining suitability, safe handling, and compliance for their intended use and jurisdiction. This document is the current published web revision; the authoritative document for any specific shipment is the revision packaged with that batch.
